1. The following is an examiner's statement of reasons for allowance: Andreasson '837 is the

closest art of record. Note projections 34 and 36 which mate with surface 103. In order for this

to happen, the cutting portion 24 and shank portion 20 must rotate relative to each other by what

appears to be a 10 degree angle of rotation (see from figure 3). This hardly constitutes the

bayonet coupling as set forth in claims 1, 11, 13, and 15 as if such a coupling were to be used, the

cutting part would fly off the shank and become a projectile whenever the rotation of the bit was

slowed down. Note from column 2, lines 51+ that the two parts are actually coupled together by

brazing, not by a bayonet connection. There is no suggestion to provide a bayonet connection

between the cutting portion and shank.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Dan Howell whose telephone number is (703) 308-1728.
